Summary

Full-stack Software Engineer with hands-on experience in building production-grade applications using **Spring Boot**, **Java**, **Angular**, and **RESTful microservices**. Skilled in delivering scalable, secure and user-centric fintech solutions with strong ownership from development to deployment.

Skills

Programming & Querying: Java, SQL, HTML, CSS, JavaScript, TypeScript

Frameworks: Spring Boot, Angular, Bootstrap, Tailwind CSS, microservice architecture

Database: MySQL, PostgreSQL

Version Control & Tools: Git, GitHub, GitLab, Postman, SOAP API

Testing: Unit testing (JUnit), debugging, API testing

Soft Skills: Effective communication, teamwork, and cross-functional collaboration

Work Experience

Software Engineer Level 1

July 2025 - Present

Interland Technology Services Pvt. Ltd.

- Developed and maintained **Spring Boot REST APIs** supporting multiple BAAS modules and business workflows, improving backend scalability and integration consistency.
- Built responsive and reusable **Angular** components using **TypeScript** and **Tailwind CSS**, reducing UI development effort for new screens and ensuring a consistent design system across portals.
- Designed and developed the **Finexus public website**, enabling seamless onboarding of fintech partners and improving product visibility for BAAS services.
- Wrote **unit tests in Spring Boot** for service and controller methods under the test directory, reducing regression issues and improving code reliability during deployments.

Associate Software Developer

July 2024 - June 2025

Interland Technology Services Pvt. Ltd.

- Contributed to the development of core BAAS modules — **Admin**, **Self-Service**, **Documentation & Developer** portals — during the foundational product build phase.
- Implemented UI screens and reusable frontend components in **Angular**, **TypeScript** and **Tailwind CSS**, improving design uniformity and development speed across modules.
- Supported backend workflows using **Spring Boot**, contributing to API development and smooth frontend-backend data integration.
- Recognized as the **Top Performer** in the company's post-training evaluation for exceptional technical proficiency and project ownership.

Projects

Banking as a Service (BAAS) | finexus.io

July 2024 - Present

- A production-grade **fintech ecosystem** designed to enable banks to expose regulated financial services via **APIs** for embedded finance and third-party integrations.
- A modular **Banking-as-a-Service** (BaaS) platform offering core banking capabilities such as onboarding, payments, lending, consent management, and analytics through secure **RESTful APIs**.
- Includes multiple portals — **Admin**, **Developer**, **Self-Service**, **Self-Onboarding**, and **Documentation** — enabling **API lifecycle management**, client onboarding, and third-party integrations.
- Provides sandbox and production environments for seamless **API discovery**, **testing**, and **consumption** by third-party providers and fintech partners.
- Implements **API monetization**, **policy enforcement**, **role-based access control**, and **audit logging**, ensuring compliance with security and regulatory frameworks.

Tech Stack: Java, Spring Boot, Angular, TypeScript, Tailwind CSS, REST APIs, JUnit, MySQL

Education

Bachelor in Technology (Computer Science and Engineering , Data Science)

Graduated: 2024

Gita Autonomous College, Bhubaneswar, Odisha

CGPA: 9.54 / 10
