Portfolio

Summary

Software Engineer with **2+ years** of experience developing enterprise fintech applications using **Java, Spring Boot, Angular**, and **PostgreSQL**. Built production REST APIs, event-driven workflows, and full-stack features across multiple Banking-as-a-Service (BaaS) portals.

Skills

Languages: Java, SQL, TypeScript, JavaScript, HTML5, CSS3

Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, Kafka, Redis

Frontend: Angular, Tailwind CSS, PrimeNG, RxJS

Database: PostgreSQL, MySQL

Tools: Git, GitHub, GitLab, Maven, Postman, JUnit, Docker

Work Experience

Software Engineer – Level 1

Jul 2025 – Present

Interland Technology Services Pvt. Ltd.

- Designed and developed **100+ production REST APIs** using **Spring Boot**, Spring Data JPA, and PostgreSQL for onboarding, user, API, plan, policy, and audit management modules.
- Implemented **Kafka**-based asynchronous workflows and contributed to migrating authentication from **OAuth 2.0** to secure **cookie-based authentication**.
- Built full-stack features across **Admin, Self-Service, Developer**, and **Documentation** portals using **Angular, TypeScript**, and **Tailwind CSS**, including the **Finexus public website**.

Associate Software Developer

Jul 2024 – Jun 2025

Interland Technology Services Pvt. Ltd.

- Developed backend and frontend features for **Ticket Management, Company Onboarding, User Management, Plans**, and **API Management** modules.
- Designed reusable **Angular** components, integrated **Spring Boot REST APIs**, and resolved **production issues** across multiple **BaaS** portals.
- Recognized as the company's **Top Performer** during post-training evaluation.

Software Development Intern

Jan 2024 – Apr 2024

Interland Technology Services Pvt. Ltd.

- Developed a customer support chatbot to automate end-to-end query resolution and streamline customer assistance.

Projects

Banking as a Service (BaaS) | finexus.io

July 2024 - Present

- A production-grade **fintech ecosystem** designed to enable banks to expose regulated financial services via **APIs** for embedded finance and third-party integrations.
- A modular **Banking-as-a-Service** (BaaS) platform offering core banking capabilities such as onboarding, payments, lending, consent management, and analytics through secure **RESTful APIs**.
- Includes multiple portals — **Admin, Developer, Self-Service, Self-Onboarding**, and **Documentation** — enabling **API lifecycle management**, client onboarding, and third-party integrations.
- Provides sandbox and production environments for seamless **API discovery, testing**, and **consumption** by third-party providers and fintech partners.
- Implements **API monetization, policy enforcement, role-based access control**, and **audit logging**, ensuring compliance with security and regulatory frameworks.

Tech Stack: Java, Spring Boot, Spring Data JPA, PostgreSQL, Kafka, Redis, Angular, TypeScript, Tailwind CSS

Education

Bachelor in Technology (Computer Science and Engineering , Data Science)

Graduated: 2024

Gita Autonomous College, Bhubaneswar, Odisha

CGPA: 9.5 / 10
